#### BIRLA INSTITUTE OF TECHNOLOGY & SCIENCE, PILANI WORK INTEGRATED LEARNING PROGRAMMES Digital Learning

#### Part A: Content Design

Course Title	Artificial Intelligence
Course No(s)	IS ZC444 / SS ZC444/SE ZC444
Credit Units	3
Course Authors	Vimal SP, Raja vadhana P
Version No	1.0
Date	July 09, 2019

## **Course Objectives**

No	Course Objective	
CO1	To provide solid foundation for designing intelligent agents	
CO2	Learn the representation and use of knowledge in inference-based problem solving approaches	
CO3	Learn to apply probability theory to describe and model agents operating in uncertain environments	
CO4	Learn the optimization models of computation and processing in real world application of intelligent agents	

#### Text Book(s)

T1	Stuart Russell and Peter Norvig, "Artificial Intelligence – A Modern Approach", Pearson Education, Third Edition.
T2	Elaine Rich and Kevin Knight, "Artificial Intelligence", Tata McGraw Hill Publishing Company, New Delhi, 2003

## **Reference Book(s) & other resources**

# Modular Content Structure

No	Title of the Module	References
M1	Introduction to AI	T1: Chapter 1, 2, 18.1
	1.1. History	R1: Chapter 2
	1.2. Intelligent Agent & Environment	R2 : Chapter 1
	1.3. Role of Learning	-
	1.4. Expert Systems	
	1.4.1. Stages of Development	
	1.4.2.Structure of Knowledge base	
M2	Problem Solving: Knowledge representation and	T1: Chapter 3, 7, 9.1, 9.2, 14.7
	Inference	T2: Chapter 6.1, 6.2, 11, 3.5
	2.1 Search Strategies	-
	2.1.1 Uninformed	
	2.1.2 Informed	
	2.2 Representation	
	2.2.1. Logic	
	2.2.2. Rule system & Fuzzy system	
	2.2.3. Semantic Nets	
	2.2.4. Objects	
	2.3 Planning	
M3	Reasoning: Static and Dynamic	T1: Chapter 9.2- 9.5, 13, 14.1 -14.4
	3.1 Monotonic	
	3.1.1 Forward Chaining	
	3.1.2 Backward Chaining	
	3.2 Non-Monotonic	
	3.2.1 Probability	
	3.2.2 Bayesian Networks	
	3.3 Introduction to Hidden Morkov Model	
M4	Introduction to Learning	T1: Chapter 18.2, 18.3, 18.7, 21.1-21.3,
	4.1 Supervised - Induction	21.6
	4.2 Unsupervised	T2 : Chapter 17.4 -17.7, 18.2-18.4
	4.3 Reinforcement Learning	http://www.deeplearningbook.org/content
	4.4 Neural Network & Deep Learning	<u>s/intro.html</u>
		Page 1-8
M5	Optimization Models	T1: Chapter 4.1
	5.1 Hill climbing Algorithm	http://www.globalspec.com/reference/661
	5.2 Genetic Algorithm	98/203279/chapter-11-introduction-to-
	5.3 Ant Colony Optimization	particle-swarm-optimization-and-ant-
MC	5.4 Particle Swarm Optimization	<u>colony-optimization</u>
MO	Al Application 1 : Gaming	T1: Chapter 5
	6.1 Al & Gaming	12: Chapter 12
	6.2 Dynamic Programming & Backtracking	
	6.5 Min-Max Algorithm	
147	6.4 Alpha – beta Pruning	T2. Character 15
IVI /	Al Application 2 : Natural Language Processing	T2: Chapter 15
	7.1 Process	11: Chapter 22, 23
	7.2 Syntax & Semantics	
MO	1.5 Disambiguation & Information retrieval	T1. Charten 25
M8	Anatomy of building AI systems	11: Unapter 25
	8.1 Shortcomings of Al	K4, K5 Unapter o
	8.2 Building Fair models	
	8.3 Interpretable models	

#### **Learning Outcomes:**

No	Learning Outcomes
LO1	Understand the environment and process of development to build intelligent agents
LO2	Identify heuristics to pursue goals in exponentially large search spaces.
LO3	Represent problem and derive reasoning using logical inferences
LO4	Apply probability theory to describe and model agents operating in uncertain environments
LO5	Analyse ways to supervise agents to learn and improve their behaviour.

## Part B: Course Handout

Academic Term First Semester 2023-2024	
Course Title	Artificial Intelligence
Course No	IS ZC444 / SS ZC444/SE ZC444
Lead Instructor	KAMLESH TIWARI

#### Glossary of Terms

- 1. Contact Hour (CH) stands for a hour long live session with students conducted either in a physical classroom or enabled through technology. In this model of instruction, instructor led sessions will be for 22 CH.
  - a. Pre CH = Self Learning done prior to a given contact hour
  - b. During CH = Content to be discussed during the contact hour by the course instructor
  - c. Post CH = Self Learning done post the contact hour
- 2. Contact Hour (CS) stands for a two-hour long live session with students conducted either in a physical classroom or enabled through technology. In this model of instruction, instructor led sessions will be for 11 CS.
  - a. Pre CS = Self Learning done prior to a given contact session
  - b. During CS = Content to be discussed during the contact session by the course instructor
  - c. Post CS = Self Learning done post the contact session
- 3. RL stands for Recorded Lecture or Recorded Lesson. It is presented to the student through an online portal. A given RL unfolds as a sequences of video segments interleaved with exercises
- 4. SS stands for Self-Study to be done as a study of relevant sections from textbooks and reference books. It could also include study of external resources.
- 5. LE stands for Lab Exercises
- 6. HW stands for Home Work.
- 7. M stands for module. Module is a standalone quantum of designed content. A typical course is delivered using a string of modules. M2 means module 2.

### Teaching Methodology (Flipped Learning Model)

The pedagogy for this course is centered around flipped learning model in which the traditional classroom instruction is replaced with recorded lectures to be watched at home as per the student's convenience and the erstwhile home-working or tutorials become the focus of classroom contact sessions. Students are expected to finish the home works on time.

### Contact Session Plan

- Each Module (M#) covers an independent topic and module may encompass more than one Recorded Lecture (RL) or Lecture Segment (LS).
- <u>Contact Sessions (2hrs each week)</u> are scheduled alternate weeks after the student watches all Recorded Lectures (RLs) of the specified Modules (listed below) during the previous week
- In the flipped learning model, Contact Sessions are meant for in-classroom discussions on cases, tutorials/exercises or responding to student's questions/clarification--- may encompass more than one Module/RLs/CS topic.
- Contact Session topics listed in course structure (numbered CSx.y) may cover several RLs; and as per the pace of instructor/students' learning, the instructor may take up more than one CS topic during each of the below sessions.

#### **Detailed Structure**

- Each of the sub-modules of Recorded Lectures (indicated by RLx.y / LS x.y / LSx.yVz) shall delivered via 30 60mins videos followed by:
- Contact session (CSx.y) of 2Hr each for illustrating the concepts discussed in the videos with exercises, tutorials and discussion on case-problems (wherever appropriate); contact sessions (CS) may cover more than one recorded-lecture (RL) videos.

## **Course Contents**

Lab Reference				
M2: Problem Solving: Knowledge representation and Inference				
Pre-CS	RL 2.1	Search Strategies : Informed & Uninformed		
	RL 2.2	RL 2.2.1. Logic: Predicate & Propositional Logic RL 2.2.2. Rule & Fuzzy System RL 2.2.3. Semantic Nets RL 2.2.4. Classes , Objects & Events		
During CS	CS 2.1	CS 2.1.1. Review of concepts covered in Recorded Lecture. CS 2.1.2. A* algorithm efficiency. Problem in searching techniques CS 2.1.3. AO* Algorithm – AND-OR Graphs		
	CS 2.2	CS 2.2.1. Solve one problem in each predicate & propositional logic CS 2.2.2. Encoding Query into Semantic net representation and Convert into frames		
	CS 2.3	CS 2.3.1. Planning – Goal stack ,Non-linear & Hierarchical planning CS 2.3.2. Constraint Satisfaction Problem	T2: Chapter 13	
Post-CS	LE 2.1	Implement Informed and Uniformed Search	Lab.No.1	
	SS 2.1	Planning	T2: Chapter 13	
	HW 2.1	Understand the syntax-Semantics of predicate logic & Logic Resolution	T1: Exercises 8.9, 8.24, 9.23	
	QZ 2.1			
Lab Reference				
		M3: Reasoning: Static and Dynamic		
Pre-CS	RL 3.1	Monotonic Reasoning : Forward & Backward Chaining		
	RL 3.2	RL 3.2.1. Non-monotonic - Probabilistic Reasoning & Bayesian Networks RL 3.2.2. Introduction to HMM		
During CS	CS 3.1	CS 3.1.1. Review of concepts covered in the Recorded lectures CS 3.1.2. Solve Problem by inference using forward chaining, backward chaining CS 3.1.3. Solve problem in Bayesian network	T2: Chapter 8.3, 8.4	
Post-CS	LE 3.1	Simulate the working of inference in a rule based system	Lab.No.2	
	SS 3.1	Implement logical reasoning for Wumpus world problem	Chapter 13.6	
	HW 3.1	Formulation of Bayesian Networks alone can be worked out in the exercise problem.	T1: Exercise 15.13	

	QZ 3.1	Quiz. Revise the concepts learnt in Module 1,2,3	
Lab Reference			
		M4: Introduction to Learning	
Pre-CS	RL 4.1	RL 4.1.1. Supervised - Induction by decision trees, Unsupervised Learning, Reinforcement Learning RL 4.1.2. Neural Network RL 4.1.3. Deep Learning – CNN, RNN	
During CS	CS 4.1	CS 4.1.1. Revise the concepts covered in the Recorded Lectures	T1: Chapter 21
	CS 4.2	CS 4.2.1. Build a model using reinforcement learning for given data	
Post-CS	LE 4.1	Familiarize with the working of Learning algorithms	Lab.No.3
	SS 4.1		
	HW 4.1	Identify features for a problem to implement reinforcement learning	T1 : Exercise – 21.6
	QZ 4.1		
Lab Reference			
		M5: Optimization Models	
Pre-CS	RL 5.1	RL 5.1.1. Hill Climbing, Simulated Annealing, Local Beam search, Genetic Algorithm RL 5.1.2. Particle Swarm, Ant Colony	
During CS CS 5.1 CS 5.1.1. Review the concepts covered in the Recorded Lectures   CS 5.1.2. Discuss the Travelling salesman problem solution w.r.t to each of the optimization model			
Post-CS	LE 5.1	Understand the implementation of Optimizations in Problem Solving	Lab.No.4
	SS 5.1	Metaheuristic Optimization Algorithms	T1: Chapter 4
	HW 5.1		
	QZ 5.1		
Lab Reference			
		M6: AI Application 1 : Gaming	
Pre-CSRL 6.1RL 6.1.1. Min-Max Algorithm RL 6.1.2. Alpha – Beta Pruning RL 6.1.3. Backtracking , Gaming as Constraint Satisfaction Problem			
During CS	During CS CS 6.1 CS 6.1.1. Review of concepts covered in the Recorded lectures CS 6.1.2. Problem solving in Min-Max Alpha-Beta pruning CS 6.1.3. CSP in Gaming		
Post-CS	LE 6.1	Understand the design of Gaming	Lab.No.5

	SS 6.1	Games in partially observable environment	T1: Chapter 5.5-5.8
	HW 6.1	Game tree construction & Interpretation	T1: Exercise 5.8
	QZ 6.1		
Lab Reference			
		M7: AI Application 2 : Natural Language Processing	
Pre-CS	RL 7.1	RL 7.1.1. NLP Process, Syntax, Semantics RL 7.1.2. Disambiguation & Information retrieval	
During CS	CS 7.1	CS 7.1.1. Review of concepts covered in the Recorded lectures CS 7.1.2. Construction of simple grammar. Construct parse trees and find the probabilities given grammar & Sentence	
Post-CS	LE 7.1	Familiarize with the basics of natural language processing	Lab No.6
	SS 7.1		
	HW 7.1	Understand the parsing process of NLP given a query.	T1: Exercise 23.10
	QZ 7.1	Quiz. Revise the concepts learnt in Module 4,5,6 & 7	
Lab Reference			
		M8: Anatomy of building AI systems	
Pre-CS	RL 8.1	RL 8.1.1. Shortcomings of AI, Building Fair Model, Interpretable Model	
During CS	CS 8.1	CS 8.1.1. Review of Concepts covered in the Recorded lecture. CS 8.1.2. Discuss sample case study/ example.	https://jolt.law.harvard. edu/digest/a-legal- anatomy-of-ai- generated-art-part-i
Post-CS	LE 8.1	Apply right technique to build AI system	Lab No.7
	SS 8.1		
	HW 8.1		
	QZ 8.1

#### **Evaluation Scheme**:

Legend: EC = Evaluation Component; AN = After Noon Session; FN = Fore Noon Session

No	Name	Туре	Duration	Weight	Day, Date, Session, Time	
EC-1	Quiz-I	Online	-	5%	September 1-10, 2023	
	Quiz-II	Online	-	5%	October 1-10, 2023	
	Assignment / Lab	Offline	-	20%	November 1-10, 2023	
EC-2	Mid-Semester Test	Open	2 Hours	30%	Friday, 22/09/2023 (AN)	
		Book				
EC-3	Comprehensive	Open	2 <sup>1</sup> / <sub>2</sub> Hours	40%	Friday, 24/11/2023 (AN)	
	Exam	Book				

#### Important Information:

Syllabus for Mid-Semester Test (Open Book): Topics in CS 1-5. Syllabus for Comprehensive Exam (Open Book): All topics given in plan of study

#### **Evaluation Guidelines:**

- 1. For Closed Book tests: No books or reference material of any kind will be permitted. Laptops/Mobiles of any kind are not allowed. Exchange of any material is not allowed.
- 2. For Open Book exams: Use of prescribed and reference text books, in original (not photocopies) is permitted. Class notes/slides as reference material in filed or bound form is permitted. However, loose sheets of paper will not be allowed. Use of calculators is permitted in all exams. Laptops/Mobiles of any kind are not allowed. Exchange of any material is not allowed.
- 3. If a student is unable to appear for the Regular Test/Exam due to genuine exigencies, the student should follow the procedure to apply for the Make-Up Test/Exam. The genuineness of the reason for absence in the Regular Exam shall be assessed prior to giving permission to appear for the Make-up Exam. Make-Up Test/Exam will be conducted only at selected exam centres on the dates to be announced later.

It shall be the responsibility of the individual student to be regular in maintaining the self-study schedule as given in the course handout, attend the lectures, and take all the prescribed evaluation components such as Assignment/Quiz, Mid-Semester Test and Comprehensive Exam according to the evaluation scheme provided in the handout.
